

PROSTHETIC INNOVATIONS, LLC ANNUAL NEWSLETTER  
CELEBRATING 10 YEARS OF BUSINESS

2016 | A YEAR IN REVIEW

**WALK ON**

Greetings to All,

We'd like to thank you, our clients, physicians, therapists, case managers, families and friends, for your support as we celebrated our tenth year. Prosthetic Innovations opened its doors in June 2006 and has provided care for clients of all ages, backgrounds and interests. Since that time, we have had one focus, to provide amputees with custom, well fit and functional prostheses that help them maximize their lives after permanent physical loss.

Why Us? The creation of a custom prosthesis is an intricate process. We employ the most appropriate tools available to produce the best results. Sometimes this can be utilizing a plaster cast to capture an impression of a residual limb, other times we use laser scanners and 3d printer. Because we do our fabrication in our facility, we control the process to ensure outstanding results. Our attention to detail at times drives our technicians crazy, but it enables outstanding results.

Our clients have given us many reasons why 100% of them would refer us to the amputee community. Many have cited our willingness to listen to and partner with our clients, others refer to our family like environment, still others appreciate the successful outcomes that we have provided. There is no magic bullet here or anywhere. But here, there is persistence and passion to discover the best prosthetic option for every individual!

We are so proud of each and every one of you. We see that you, our clients, never give up. You teach us what it means to be tough, brave and determined. Your example inspires us to continue striving for excellence.

On behalf of our entire team at Prosthetic Innovations, thank you for being such an integral part of our lives and continued success. We wish you a happy, healthy 2017!

In Good Health,
